Worst Fears

- Some teachers refuse to engage in technology... what to do with them?
- The interpersonal skills will be lost along the way
- What if the technology fails?
- Malware like viruses
- Technology gets in the way of the learning.
- Lose touch of the personal interaction.
- Digital divide will widen.
- Support to maintain the system.
- Over-use of the technology instead of standards.
- Not enough training time and practice
- Loss of written history
- Under-utilization of the tech.
- Bombardment of emails... will I miss something?

Best Hopes

- More engaged students excited about learning
- Less Paper
- We teach students to utilize the hardware as a TOOL
- Better communication between teachers, staff, parents
- Students will have access to engage in this kind of learning.
- Easy access to data
- Tech supports and enhances student learning
- All teachers will embrace the technology
- Targeting the needs of the students through the data collection.
- Documentation is stored.
- All teachers have access to the same tech.
- Better-informed practice.
- Made communication more open.
- With all the $$ in tech, the state will realize that we need the site level tech coordinator.
- As tech develops, the price will decrease.
